

# INTERESTED IN A CAREER IN HEALTH CARE?

## STUDY AT THE MICHENER INSTITUTE

- ✓ With exclusive programs leading to health care jobs
- ✓ Part of the University Health Network – Canada’s largest and most celebrated health care system
- ✓ 89% of graduates attribute their career success to their Michener education

In addition to our current programs, in September 2023, Michener will offer a new 2-year diploma program – **Fundamentals of Health Care**

- Gives students the knowledge, skills and competencies needed to move seamlessly to a host of health care jobs ranging from patient care to the management, design and operation of Canada’s health care system and institutions.
- A flexible program that accommodates your learning needs and styles, life constraints and job aspirations.
- Courses are online; students study at their own pace.
- Practical and experiential learning opportunities are available.
- Prior learning and experience may be considered, and students may apply for advanced standing to shorten the program.

### WHO SHOULD APPLY?

- High school graduates who want to work in health care.
- Students with some college or university experience, credentials or degrees, who are seeking meaningful careers in health care.
- Students looking to upgrade their knowledge and skills to make them more competitive for better jobs in health care.
- Internationally-educated students who are seeking access to jobs in Canada’s vast health care system.
- Individuals looking for a career change to meaningful positions in patient and health care.

*“Attending Michener for a career in the applied health sciences was a very easy decision when I knew I wanted to thrive in a patient-centred role. Michener’s clinical placement opportunities are a key component to gaining the hands-on experience needed in today’s health care fields, and the small class sizes ensure that instructors can offer individualized attention and personally direct our skills.”*

**Shirley B.**

Third-year Michener student

*“Michener programs give students the knowledge and skills they need to get, succeed and thrive in meaningful and important health care vocations.”*

**Dr. Kevin Smith**

President & CEO, UHN
